

KINIK

OVERVIEW

Control software for Linn home-theatre systems

KEY FEATURES

- Provides wireless operation of systems containing a Linn KISTO or KINOS system controller
- Operates on many Pocket PCs
- Can control non-Linn sources
- 2-way communication
- Simple, intuitive operation
- Very little programming required

KINIK (pronounced 'ki-NEEK') is Linn-designed software that enables wireless control of the Linn KISTO and KINOS system controllers and any source components connected to them, via a Pocket PC.

It will control all Linn source components with RS232 compatibility, as well as the Linn KIVOR music library system. KINIK can also control non-Linn sources including CD and DVD players, and satellite and cable receivers, via a Linn DEKODA IR translator.

The software operates on many Pocket PCs running Windows Mobile 2003 SE or Mobile 5 and is exceptionally simple to use, with full set-up possible in just a few minutes.

KINIK provides instant two-way communication between user and system, allowing instant feedback of track, volume and source information. In addition, because KINIK is a wireless application, it can be used anywhere within the range of a suitable router, offering extremely flexible control of any home-theatre system.

KINIK

SYSTEM REQUIREMENTS

Control software for Linn home-theatre systems

- Introduced 2006
- Software requirements KISTO running V 0.7 software or later
KINOS running V 0.6 software or later
- Pocket PC KINIK is compatible with Pocket PCs running
Windows Mobile 2003 SE or Mobile 5 that
have a 480 x 640 pixel VGA display
- Router 802.11b or g type wireless router
- Ethernet cables One cable of suitable length is required to
connect KISTO/KINOS to the router. If a
KIVOR TUNBOKS or INDEX is connected to
the system controller, a further cable is required
to connect it to the router/access point
- Compatible Linn source products UNIDISK 1.1
UNIDISK 2.1
UNIDISK SC
CD12
MAJIK CD
PEKIN (if RS232 option fitted)
IKEMI (if RS232 option fitted)
GENKI (if RS232 option fitted)
KIVOR TUNBOKS
KIVOR INDEX

DEKODA and LINSTALL 2 (V 2.7 software or later) required if any non-Linn sources are connected to the KISTO/KINOS.
